☐ Notice of Informal Patent Application, PTO-152

□ Other.

Art Unit: 2855

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Mima. Mima teaches a web tension measurement device comprising: a roller 19 for contacting a web Y of material, the roller having an axis of rotation A, the axis being moveable in a first directionby the web or the roller can be stationary; a counteracting device 26, having a shaft, connected to the roller, the counteracting device for forcing the roller in a second direction opposite the first direction; and a controller (col. 15, lines 47-68 through col. 16, lines 1-68), connected to the counteracting device for measuring the web tension; lever arm 24; pivot shaft mechanically linked to the counteracting device. The steps in the claimed method of claims 10-13 are deemed to be clearly anticipated by the functions of the structure of the apparatus discussed above.
- 3. Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 09/726,240
